AMENDMENTS

Please amend the claim set to read as follows:

1-67. (Canceled)

- (Currently amended) A polymer matrix composition for plastics applications comprising consisting-essentially of:
 - (a) a pigment, said pigment comprising an inorganic pigmentary base that has been treated with an organo-acid phosphate compound having the formula:

(R-O)_xPO(OH)_y

wherein x = 1 or 2,

y = 3 - x, and

R is an organic group having from 2 to 22 carbon atoms;

and

(b) a polymer,

wherein said polymer matrix has an essential absence of water and an essential absence of organic solvents.

- 69. (Previously presented) The polymer matrix of claim 68, wherein said polymer is selected from the group consisting of polyethylene, copolymers of ethylene with alpha-olefins containing 4 to 12 carbon atoms, polypropylene, polycarbonates and polystyrene.
- 70. (Previously presented) The polymer matrix of claim 69, wherein said polymer is polyethylene.

Applicants: El-Shoubary et al.

Application Serial No.: 09/723,098 Filed: November 27, 2000

71. (Previously presented) The polymer matrix of claim 68, wherein said pigment comprises

50 – 85% by weight of the polymer matrix based on the weight of the polymer matrix.

72. (Previously presented) The polymer matrix of claim 68, wherein R is an organic

compound group having six carbon atoms.

73. (Previously presented) The polymer matrix of claim 68, wherein R is an organic

eompound group having eight carbon atoms.

74. (Previously presented) The polymer matrix of claim 68, wherein R is 2-ethylhexyl-.

75. (Previously presented) The polymer matrix of claim 68, wherein the pigmentary base is

selected from the group consisting of titanium dioxide, kaolin, talc, mica and calcium

carbonate.

76. (Previously presented) The polymer matrix of claim 75, wherein the pigmentary base is

titanium dioxide.

77. (Previously presented) The polymer matrix of claim 68, wherein the amount of organo-

acid phosphate compound in the pigment is from about 0.01 percent to about 5 percent

by weight, based on the weight of the pigmentary base.

78. (Amended) A polymer matrix composition for plastics applications **comprising**

consisting essentially of:

 a pigment, said pigment comprising an inorganic pigmentary base that has been treated with an organo-acid phosphate compound having the

formula:

 $(R-O)_xPO(OH)_y$

wherein x = 1 or 2,

y = 3 - x, and

R is an organic group having from 2 to 22 carbon atoms;

- (b) a polymer; and
- at least one compound selected from the group consisting of metal oxides, polyalcohols and alkanolamines,

wherein said polymer matrix has an essential absence of water and an essential absence of organic solvents.

- 79. (Previously presented) The polymer matrix of claim 78, wherein said polymer is selected from the group consisting of polyethylene, copolymers of ethylene with alpha-olefins containing 4 to 12 carbon atoms, polypropylene, polycarbonates and polystyrene.
- 80. (Previously presented) The polymer matrix of claim 79, wherein said polymer is polyethylene.
- 81. (Previously presented) The polymer matrix of claim 78, wherein said pigment comprises 50 – 85% by weight of the polymer matrix based on the weight of the polymer matrix.
- 82. (Previously presented) The polymer matrix of claim 78, wherein R is an organic empound group having six carbon atoms.
- 83. (Previously presented) The polymer matrix of claim 78, wherein R is an organic eompound group having eight carbon atoms.

84. (Previously presented) The polymer matrix of claim 78, wherein R is 2-ethylhexyl-.

85. (Previously presented) The polymer matrix of claim 78, wherein the pigmentary base is

selected from the group consisting of titanium dioxide, kaolin, talc, mica and calcium

carbonate.

86. (Previously presented) The polymer matrix of claim 85, wherein the pigmentary base is

titanium dioxide.

87. (Previously presented) The polymer matrix of claim 78, wherein the amount of organo-

acid phosphate compound in the pigment is from about 0.01 percent to about 5 percent by

weight, based on the weight of the pigmentary base.

88. (Previously presented) The polymer matrix of claim 78, wherein the compound of (c) is a

metal oxide and the metal oxide is selected from the group consisting of aluminum oxide,

silicon dioxide and zirconium oxide.

89. (Previously presented) The polymer matrix of claim 78, wherein the compound of (c) is a

polyalcohol and the polyalcohol is selected from the group consisting of

trimethylolethane and trimethylolpropane.

90. (Previously presented) The polymer matrix of claim 78, wherein the compound of (c) is

an alkanolamine.

91. (Previously presented) The polymer matrix of claim 90, wherein the alkanolamine is

triethanolamine.
